

The Cloud-Based FAX Server for Your AS/400 and IBM Power Systems

Do You Have a Business Continuity Solution in Place For Your IBM Fax Processes?

If you have business-critical fax processes running from your AS/400, System i or Power System, it makes sense to have a business continuity solution in place to prevent any negative impact on your business should a problem occur.

With CloudFAX400 you can have all the features usually associated with an on-premise, enterprise-level fax server, conveniently hosted for you in the cloud, including:

- ✓ Desktop Faxing
- ✓ Workflow Integration
- ✓ Automatic Document Routing
- ✓ OCR/Barcode Scanning
- ✓ Application Integration
- ✓ Reporting and Analytics

The screenshot shows the CloudFAX400 configuration or management interface. It features a navigation menu at the top with options like 'Dashboard', 'Configuration', 'System Management', and 'Help'. The main content area displays a list of configuration items, including 'Fax Server', 'Fax Gateway', and 'Fax Queue'. Each item has a 'Status' column and a 'Details' link. The interface is clean and professional, with a light blue color scheme.

The Secure, Compliant and Fully Supported Enterprise FAX Server in the Cloud

CloudFAX400 is one the most secure hosted fax solution on the market today, so you can meet the toughest security, compliance, and data protection regulations such as HIPAA, SOX, PCI, SAS-70, GLB, and NIST.

All of your traffic is SSL protected to provide the highest level of security for your fax communications.

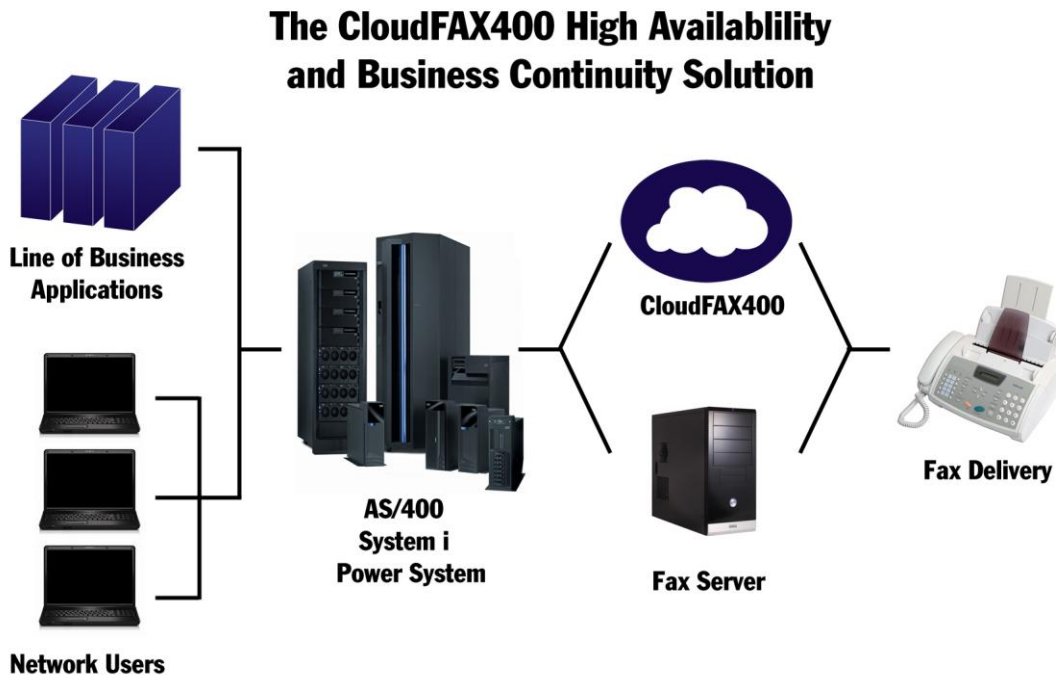

CloudFAX400 scales easily to meet the demands of your evolving business requirements and enables you to manage your FAX traffic and get real-time reports through a browser based administration panel on your intranet.

The CloudFAX400 service is fully supported by our Teams in the USA and the UK, so we will always be here to help keep your processes running smoothly.

The Cloud-Based FAX Server for Your
AS/400 and IBM Power Systems

A Business Continuity Solution

CloudFax400 as a seamless business continuity and failover solution for all of your IBM midrange FAX processes.

If an issue occurs with your internal fax servers or phone lines, your FAX processes can automatically switch across to your CloudFAX400 service with no negative impact on your business.

A Load Balancing and High Availability Solution

You can also run CloudFax400 alongside your internal fax servers as a Load Balancing Solution to eliminate underutilized FAX Servers and phone lines. CloudFax400 can provide you with load balancing on demand and provide extra capacity for peak usage or high-volume fax blasts.

To find out how much time, money and hassle CloudFAX400 can save you, try our FREE Savings Calculator today at www.CloudFax400.com or contact us today with the details below.
